Visible Emission From Shaker	<u>No 7</u>	<u>—</u>
Visible Emission From Discharge Conveyor System	<u>No 2</u>	<u>—</u>

- Visible inspection must be performed during normal daylight operations and during the part of operations that would normally be expected to cause the greatest emissions.
- **Opacity** is a measure of the degree to which emissions reduce the transmission of light and obscure the view of an object in the background.

Visible Emission From Shaker	<u>NOR</u>	-
Visible Emission From Discharge Conveyor System	<u>NOR</u>	-

- Visible inspection must be performed during normal daylight operations and during the part of operations that would normally be expected to cause the greatest emissions.
- **Opacity** is a measure of the degree to which emissions reduce the transmission of light and obscure the view of an object in the background.
